

PSC

Engineering & Contracting

PSC S.R.L. ENGINEERING & CONTRACTING

PSC Srl Engineering & Contracting is a worldwide known and appreciated contractor in EPCM (Engineering, Procurement and Construction Management) projects, operating in several markets, with an imperative commitment to quality.

The company is characterized by the utmost professionalism of its personnel and the resolute attitude to excellence. Since 1989 PSC is an engineering partner to EPC Contractors and End Users all over the world.

PSC's structure is multidisciplinary, organized in four divisions:

WATER AND WASTEWATER TREATMENT PLANTS

**AUTOMATION CONTROL SYSTEM
& POWER DISTRIBUTION SYSTEM (LV/MV)**

ADVANCED ENGINEERING SERVICES

PROCESS ENGINEERING AND SPECIAL PROCESS PACKAGES

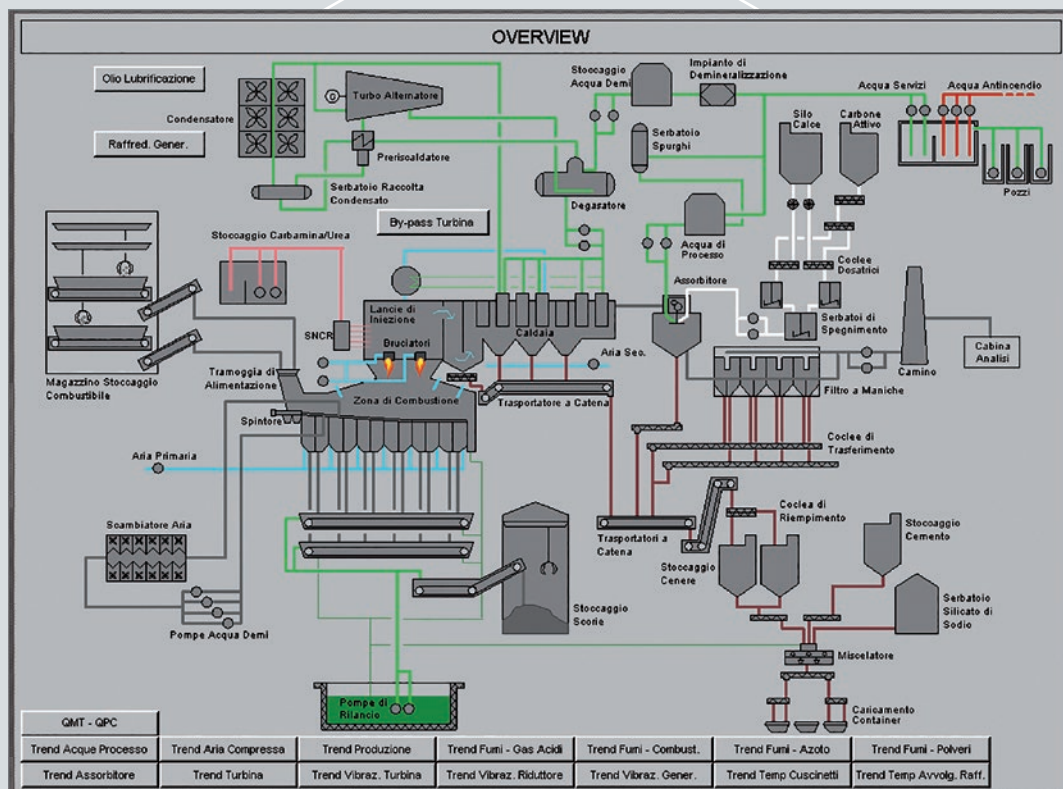

PSC is proud to assert that during the years, the respect for commitment and the loyalty to the undertaking created trustful and durable relationships with clients, partners and subvendors, realizing a positive and friendly climate to express its potential.

ENGINEERING AND TECHNICAL SERVICES

PSC provides multidisciplinary engineering services both as a "standalone supply" and as support for other Company Divisions.

The main sub-sections of our Engineering Division are:

- Process Engineering;
- Mechanical & Structures Engineering;
 - Instrumentation Engineering;
- Automation & Control Engineering;
 - Electrical Engineering.
 - Piping Engineering

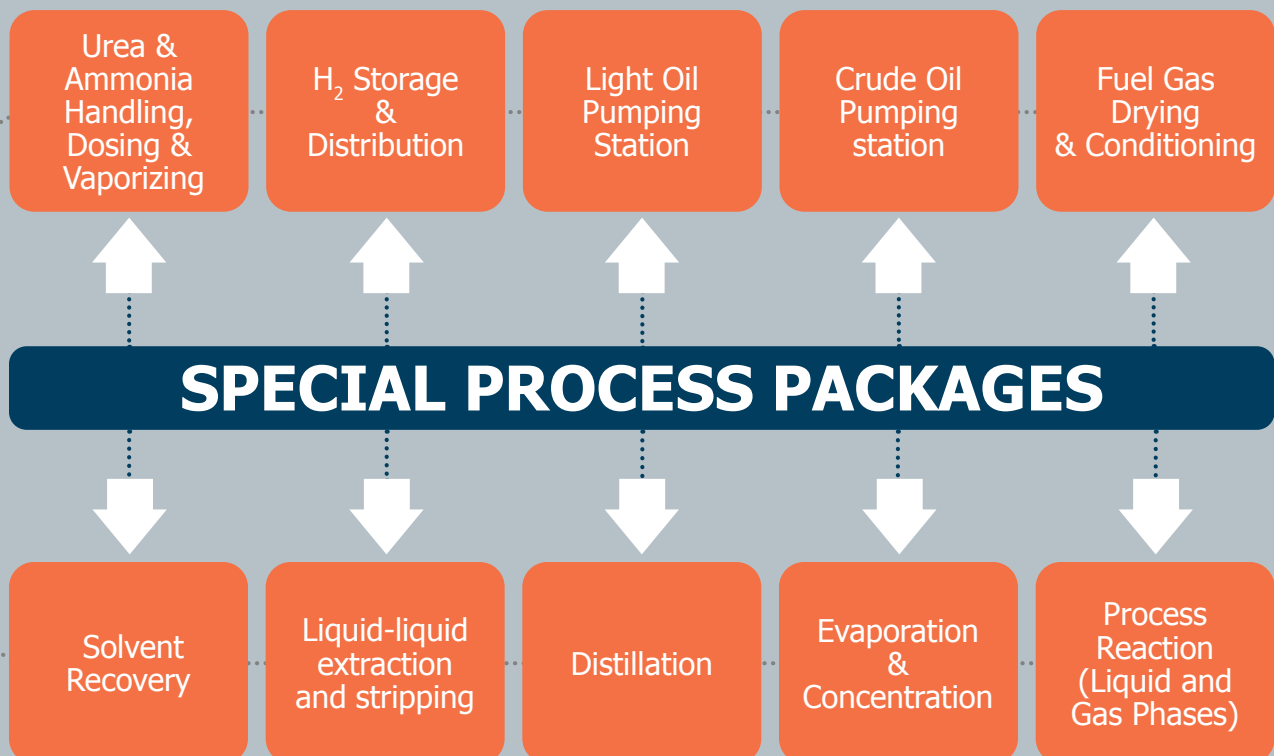

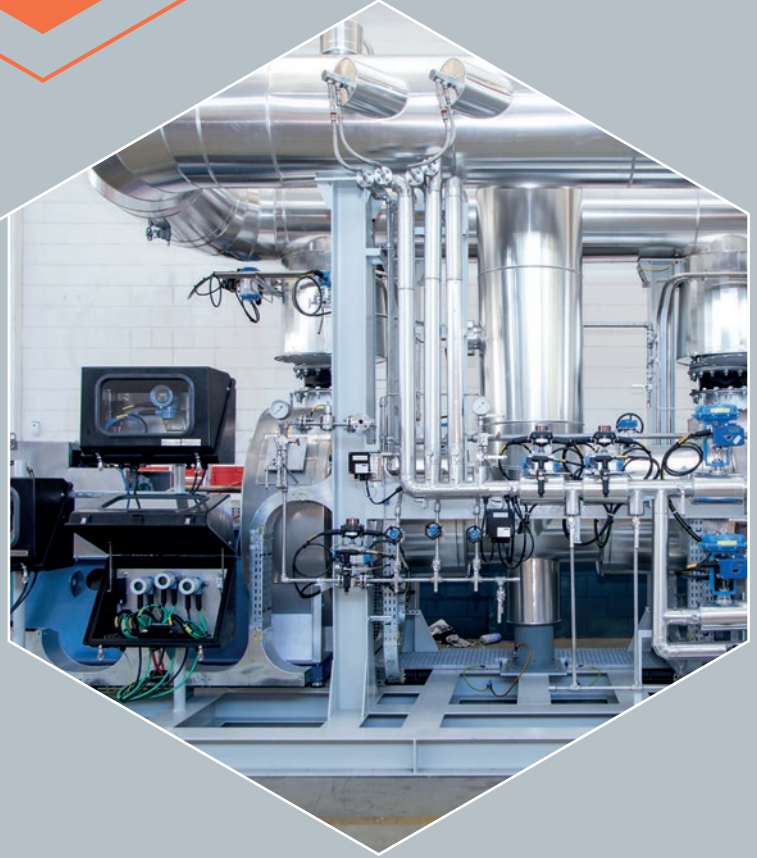

The **Advanced Engineering Services Division** is the core of PSC's success: the professionalism of its personnel, keeping up-to-date on international standards, on new technological releases, allow PSC to deliver sophisticated and efficient services in any field.

PSC's strength is to provide a flexible and multi-disciplinary solutions tailor-made to each client's requirement.

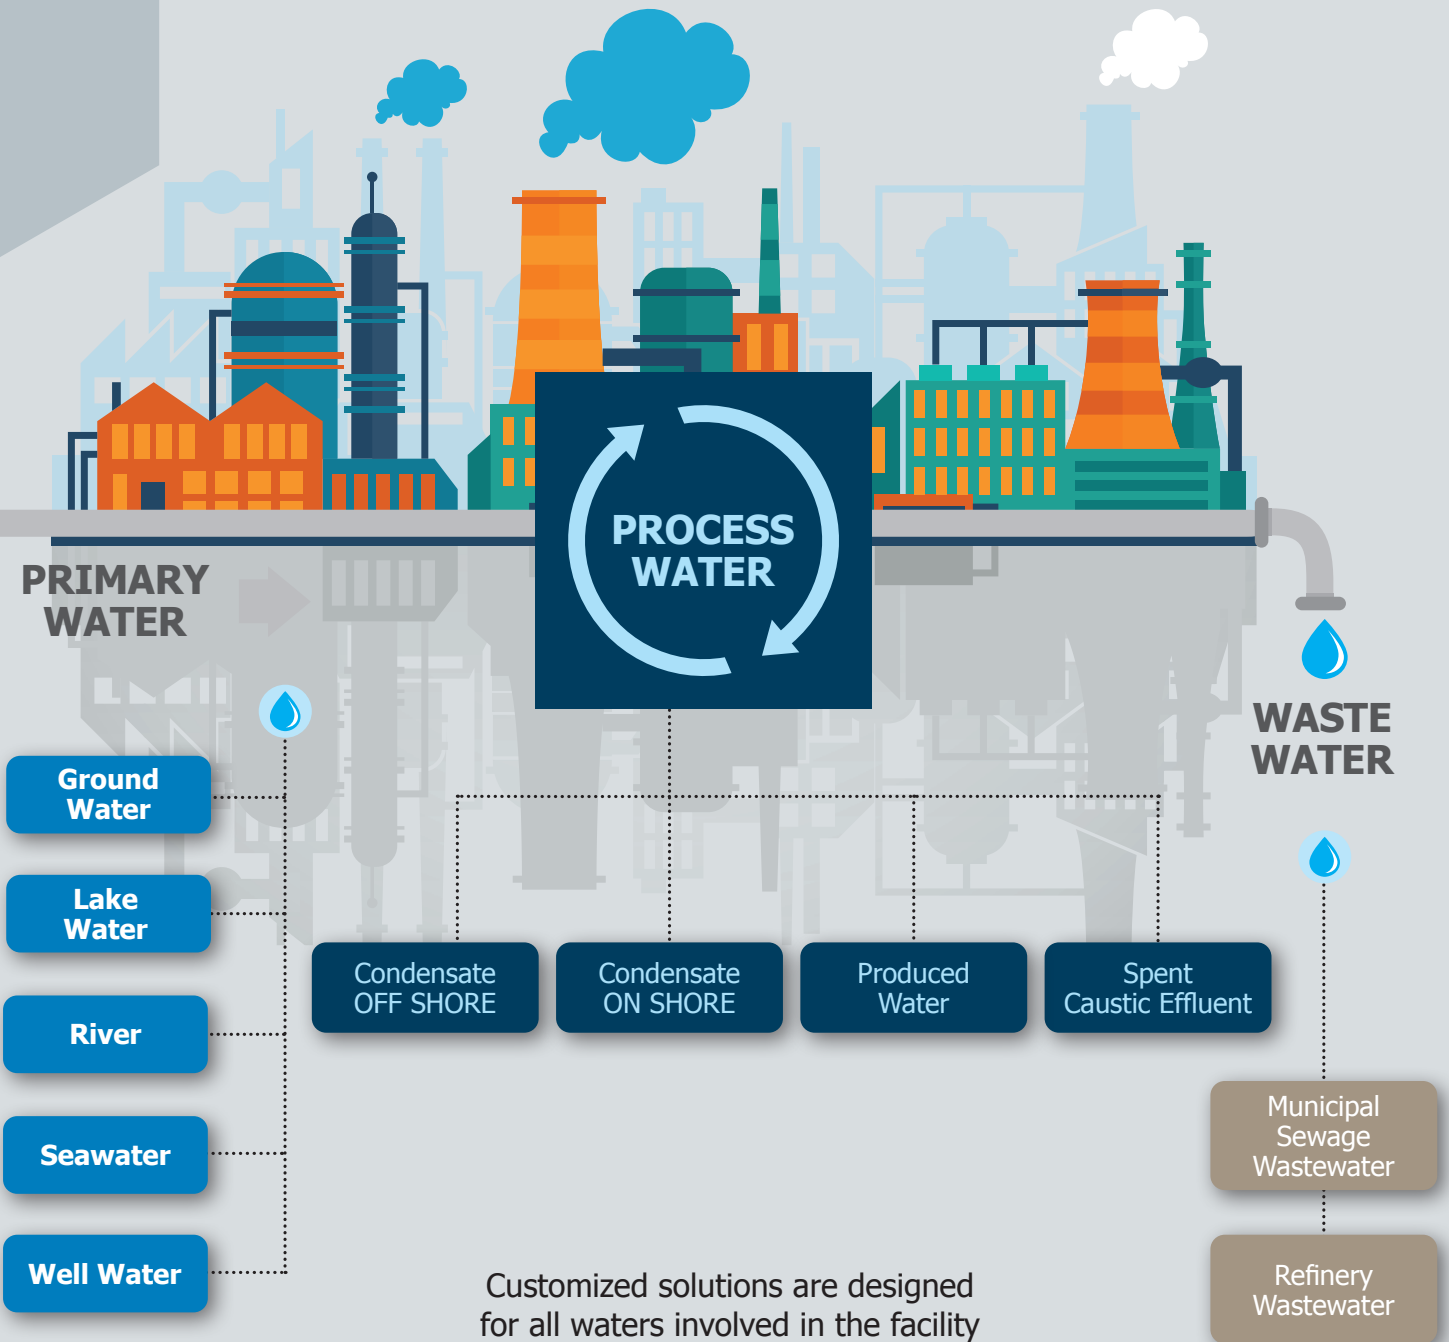

PROCESS ENGINEERING AND SPECIAL PROCESS PACKAGES

Design and supply
of Special Process
Packages in the
field of chemical,
petrochemical, oil &
gas and power sectors.

WATER

Customized solutions are designed for all waters involved in the facility for all industrial markets:

- Oil & gas
- Oil refinery
- Chemical and Petrochemical
- Power and co-generation Plants

In the sight of environmental sostenibility **Zero Liquid Discharge (ZLD)** philosophy is always applied in PSC design.

AUTOMATION & POWER DISTRIBUTION

DCS (Distributed Control System)

I/O Capacity from 2.000 up to 16.000

PAC - PLC

Modular controllers for the management of industrial machines and process

HMI - SCADA

Users interfaces for smart information management, from small local operator panel to full-integrated PC based control rooms.

SIS - ICSS

Industrial safety & emergency shutdown systems and HAZOP support

ECMS

Electrical Control and Monitoring Systems

UL certification
for Industrial
Control Panels.

LV POWER DISTRIBUTION PANELS

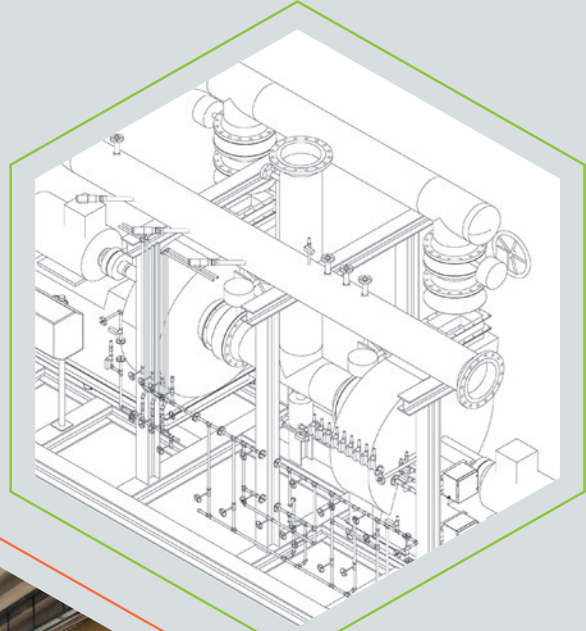

Wide range of low voltage panels and Motor Control Centers (MCC).

PSC executes turnkey projects, integration with other companies' equipment and systems, as well as engineering and logistics management.

Its activities are based on advanced engineering know-how including definition of user needs, manufacture of electrical panels, electrical installation works and commissioning in the field. PSC has experience in many production facilities extending across a wide variety of industries.

DISCIPLINARY SKILLS

Special Process Packages

Focused on the design and construction of Skid Mounted Systems or Packages, complete Turn-key plants as well as Process Engineering Services

Engineering,
Highly skilled professionals, constantly updated on new technological releases, ensuring quality engineering products and solutions

Water
Great experience in the fields of Water and Wastewater Treatment in all Industrial applications

Automation and Distribution
Over 30 years experience of supplying Automation and control products to EPC, END USERS and DIRECT Costumers
